

Custom MPN'S

Focusing on high quality medical care and managing costs, Arissa creates medical provider networks (MPN's) by hand selecting a mix of qualified physicians in the fields of work-related injuries and general medicine. The MPN's also include hospitals, urgent care centers and ancillary providers to cover all of the needs of an injured employee.

In the majority of cases, MPN's allow the insurer or self-insured employer to have complete medical control for the entire time an employee is injured.

Arissa's customized MPN's are developed with the specific needs of the insurer or self-insured employer in mind at all times. From managing the network of providers, to assisting injured employees locate the appropriate physicians and creating state regulated notices and posters Arissa works with our customers to ensure cost effective, high quality medical treatment for their worker's compensation claims.
